I think the worksheets during class helped a lot . Overall really good pace for this course and tying everything in! I learned a lot!
I thought the course was great! I learned so much, only thing was early on in the semester there was some mistakes in the slides. Wasn't a big deal though!
I thought the way this class was taught really well and at the begin when we didn't have worksheets, it was a little bit tougher. But when worksheets started being handed out in class, it was much better.
The working sheets were very helpful and I believe they would be a useful tool for future students too. The professors availability and help outside class is outstanding. Finally the professor's passion about the topic motivated me in this class and inspired very interesting discussions.
Really enjoyed all the concepts and topics, from Ricardian Model, to Hecksher–Ohlin model, especially how they all flowed together. Course content is challenging, but never overwhelming.
